1. user writes query: **contextual menu**

2. Blueprint augments the query: 
   *contextual menu* + **Flex 3**  
   + **Flex 4**  
   + **Javascript**

3. Blueprint retrieves search results from Adobe Community Help (a Google Custom Site Search service), which indexes reference documentation, tutorials, blogs, and forums

4. Blueprint extracts code examples and descriptions

5. Sample-centric search results display the extracted code examples along with English description and available running examples.
